Bisphenol A Declaration – WSW Wälzlager Wolfgang Streich GmbH & Co. KG

WSW Wälzlager Wolfgang Streich GmbH & Co. KG, Ravensberger Bleiche 5, 33649 Bielefeld, Germany, issues this declaration to all customers. It applies to all products we supply, including, in particular, plain bearings, roller bearings, and spherical bearings, ball joints, special and connecting parts and seals.

Bisphenol A (BPA; CAS 80-05-7, EC 201-245-8) is an industrial chemical used primarily in the manufacture of polycarbonate plastics and epoxy resins. Due to its toxic-for-reproduction and endocrine-disrupting properties, BPA is included in the REACH Candidate List of Substances of Very High Concern and is subject to increasing restrictions in the EU, for example in thermal paper and in food contact materials. Against this background, we have requested information from our suppliers on the materials used in our products. We declare that all our products are **free** from Bisphenol A.

The information in this declaration is based on our current state of knowledge and on the feedback from our suppliers.

Bielefeld, 02.11.2026, Robert Streich, CEO
